Our company

Regional knowledge. Global connections.

Dubai + Alexandria

Nano Logistics was established in Egypt in 2018. Its founders have been active in the shipping industry since 2005, gaining experience in liner shipping and logistics. Nano Smart Logistics Dubai is part of the Nano Logistics group.

Experience across shipping modes

Years of hands-on experience have developed our understanding of different shipping modes and their suitability for different types of cargo. A network of professionals helps us manage challenges, coordinate the landing and delivery of goods, and facilitate customs transactions.

Specialist care, wider reach

Our team brings forwarding and shipping expertise, with a particular focus on refrigerated containers. We develop solutions for containers, breakbulk, flat racks and LCL imports and exports. We seek cooperation with international shipping agencies across Europe, America, Africa, and the Near and Far East.

Built on lasting partnerships

We aim to expand through partnerships with new clients and shipping agencies. Honesty, accuracy, advanced packaging techniques, and modern land, sea and air freight solutions remain central to our approach.

Mission & vision

Our purpose. Our principles.

Our mission

To exceed customer expectations through freight forwarding and global transportation solutions, specializing in air freight, ocean freight, customs brokerage and logistics services tailored to each customer.

Service with integrity

Our professionals aim to provide exceptional service through technology, expertise and infrastructure, with efficient solutions and dependable shipment delivery. Honesty and integrity are our foundations. We approach each customer with flexibility and a focus on results and proper delivery.

Our vision

To become a leading, trusted company nationally and internationally in shipping, logistics and relocations.

Our keys to development

- Excellence and innovation
- Building trust and confidence
- Transparency and teamwork

We believe in

- Motivation, collective responsibility and leadership
- Professionalism and ethics
- Adding value to our clients' needs

Why choose Nano?

People, flexibility and specialist care.

Regional expertise

Skilled, experienced local representation, supported by more than ten years of logistics experience and knowledge of regional trade requirements.

Efficiency

Efficient processes, intelligent technology and fast, accurate documentation help customers save time and manage costs.

Flexibility and personal support

Solutions are built around supply chain challenges, rather than rigid packages. A dedicated point of contact works as an extension of your operation, with a focus on turnaround and costs.

Sustainability

By identifying and monitoring the carbon footprint of transport and logistics activities, we help customers understand their environmental impact and set sustainability targets.

Reefer expertise

Specialist knowledge of refrigerated containers supports solutions for temperature-sensitive cargo.

Areas of expertise

Logistics knowledge. Practical value.

Professional, focused operations

Nano Smart Logistics combines professional expertise with specialized operations. We help customers better understand their logistics choices and integrate modern management practices with logistics knowledge to develop cost-effective supply chain solutions, products and services.

Sharing skills

We recognize the value of transferring skills to client personnel, supporting long-term capability development and value creation.

Core capabilities

- Air freight and ocean freight
- Road freight
- Supply chain solutions
- Customs clearance
- Trade services
- Breakbulk

Current service portfolio

The following pages bring these capabilities together with the website's seven services, including dedicated cold chain and warehousing solutions.

Ocean + air freight

The right mode. The right solution.

01 / Ocean freight

Import and export solutions across global trade lanes, with equipment and consolidation options matched to your cargo.

- Full container load (FCL) and less than container load (LCL)
- Breakbulk and flat rack options
- Carrier coordination for international movements

02 / Air freight

Air cargo services for time-sensitive shipments, with routing and service levels built around your collection and delivery needs.

- Door-to-door and airport-to-airport
- Door-to-airport and airport-to-door
- Scheduled movements on major international routes

Road + cold chain

Connected on land. Care in every movement.

03 / Land & road freight

Cross-border trucking and overland freight across the UAE, GCC and wider Middle East, connected with ocean and air movements.

- Regional cross-border transport
- Integrated door-to-door movements
- Shipment coordination and consignment updates

04 / Reefer & cold chain logistics

Refrigerated container handling and cold chain management for cargo that needs temperature-controlled care, from pickup to final delivery.

- Food and other perishables
- Temperature-sensitive healthcare cargo
- Handling plans matched to each shipment

Customs clearance

Clear documentation. Confident next steps.

05 / Customs clearance & brokerage

Support with import and export formalities across sea, air and land. We organize documentation and coordinate customs processing through the UAE's ports and airports.

Local regulatory knowledge

Experience with different shipment sizes supports guidance on local customs rules and trade compliance requirements.

Tailored documentation support

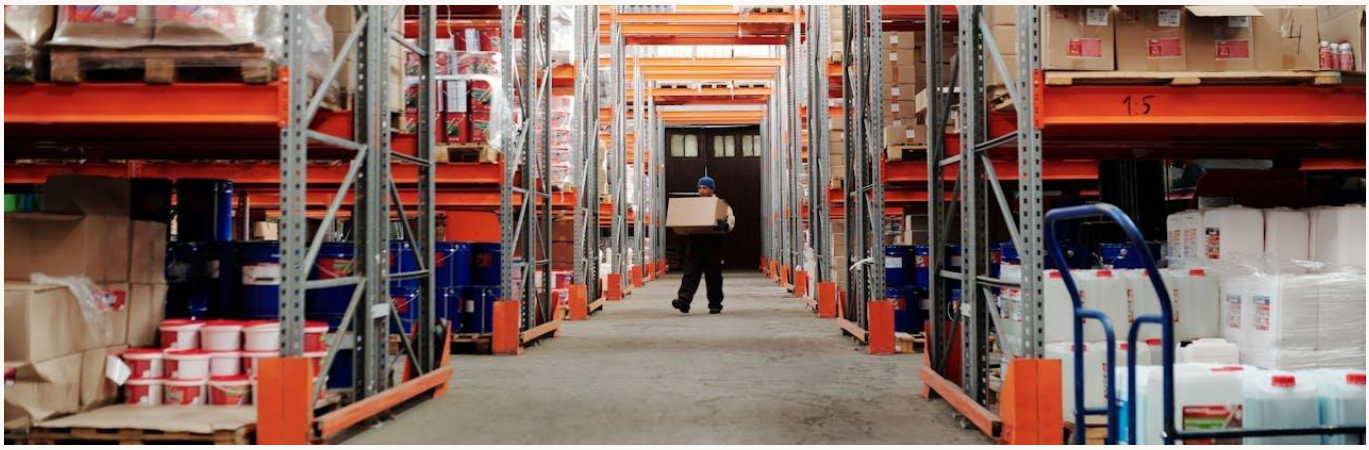

We consider your industry and shipment requirements, help organize documentation and day-to-day formalities, and work to reduce lead times and manage costs.

Import and export, end to end

From regulatory guidance and clearance coordination to the onward delivery plan, we connect customs handling with the wider logistics process.

Warehousing + supply chain

Beyond the shipment.

06 / Warehousing & distribution

Flexible warehousing solutions in Dubai's free zones and logistics corridors, with plans shaped around your cargo, timing and budget.

- Storage options for your cargo
- Inventory management
- Distribution and last-mile delivery

07 / Supply chain solutions

End-to-end supply chain management tailored to your business, from sourcing and consolidation to delivery and returns.

- Sourcing and collection support
- Shipment consolidation and delivery
- Returns coordination
- A dedicated point of contact

Strengths & capabilities

A connected partner for your operation.

International network

A worldwide network of associates with strong positions in their markets supports global reach and dependable coordination.

Carrier relationships

Preferential rate agreements with major shipping lines and airlines provide cost advantages for clients.

Dedicated account management

Dedicated account managers support customer focus and personal service.

Single-window service

One point of coordination simplifies communication and day-to-day operations across the logistics process.

Tailor-made solutions

Logistics expertise enables supply chain solutions built around each customer's specific needs.
